

ATINA JDE CONNECTOR

Secure, Modern Integration for JD Edwards

The Problem

Traditional JD Edwards integrations are complex, SOAP-based, hard to scale, and difficult to secure.

The Solution

The Atina JDE Connector enables high-performance, secure integration using gRPC and modern microservices.

Key Capabilities

- gRPC-based architecture
- TLS support (HTTPS / port 443)
- MuleSoft integration
- Works with Caddy / NGINX

Architecture

MuleSoft → HTTPS (443) → Proxy (TLS termination) → HTTP/2 (gRPC) → Atina Microservice → JD Edwards

Benefits

- Modernize JDE integrations
- Improve performance
- Enable secure cloud deployments

Status

Version 1.0.1-RC1 (Release Candidate) with TLS support. Pending MuleSoft certification.

Availability

Distributed via Atina private JFrog repository for validation.
